

All of us have experienced or been witness to the myriad facets of womanhood, be it the benevolence of motherhood, the peaceful countenance personifying gentleness, the firm protectiveness extended towards loved ones, the modesty of a young woman, the beauty exuded by a woman or the compassion and forbearance, characteristic of womanhood.

Twelve of these intrinsic aspects of feminine being are depicted in stunning visuals in stained glass. The paintings are available as a collector's series of twelve as well as individual pieces.
